

At RepScrubs® and VPro, our top priority is supporting hospitals in delivering the safest, most compliant environment for patient care. That's why we've partnered to launch a new Vendor Access Program focused on credentialing, compliance and streamlined access to procedural areas.

What's Changing?

To meet hospital safety and compliance standards, all vendors must now:

- Be credentialed through and fully compliant in VPro
- Wear hospital-approved, single-use RepScrubs® before entering restricted areas

These steps are **mandatory** to access the perioperative department and help ensure a safer environment for everyone.

VPro + RepScrubs® Process:

1. Sign In at the Kiosk & Get Your VPro Badge

- Log into your Verified Professionals account
- A valid mobile number is required to receive a verification code
- Your compliance badge is valid for 24 hours

2. Wear Your VPro Badge

- Display your VPro badge clearly—above or below your RepScrubs® badge

3. Dispense Your RepScrubs®

- Use the ScrubPort® machine near procedural or patient care areas to get your single-use scrubs

4. Wear Your RepScrubs® Badge

- The ScrubPort® will print a badge—place it over the "VOID" lettering on your scrub top
- Forgot your badge? You may be asked to return to ScrubPort® or contact RepScrubs®, and they'll be able to print one remotely.

Don't have a RepScrubs Account?

Please visit RepScrubs.com and click on "Registration." After completing the online registration, you will receive an 8-digit ID Number and a 4-digit Pin Code of your choice.

If you are already registered with **RepScrubs®**, please use your current ID Number and Pin Code, or download the **RepScrubs® Mobile App** to access the ScrubPort at any facility Nationwide.
